

time	speaker	session	chair
17 July 2013			
12:00	Registration		
13:00	K. Friston	Opening lecture: Free energy and active inference	
14:30	<i>coffee</i>		
15:00	D. Oswald	A Beginner's Guide to Variational Bayesian Inference for Hierarchical Probabilistic Time Series Models	C. Mathys
15:30	J. Daunizeau	Theory of Mind: lessons from inverse Bayesian decision theory	
16:00	A. Bastos	Canonical microcircuits for predictive coding	
16:30	<i>coffee</i>		
17:00	H. Brown	Precision modulation: a mechanism for attention?	R. Adams
17:30	C. Summerfield	Adaptive gain during human perceptual choice	
18:00	F. de Lange	Why do priors dampen sensory responses?	
18:30	End (day 1)		
18 July 2013			
09:00	F. Blankenburg	Predictive coding and somesthesia	D. Oswald
09:30	S. Kiebel	Perceptual decision making on dynamic stimuli	
10:00	C. Wacongne	Predictive coding in auditory cortex: a joint modeling and imaging approach	
10:30	<i>coffee</i>		
11:00	C. Mathys	The delicate balance between accuracy and complexity: psychopathology as the breakdown of free-energy minimization	H. Brown
11:30	P. Sterzer	The formation and maintenance of delusions – a predictive coding account	
12:00	R. Adams	Modelling smooth pursuit eye movements in schizophrenia	
12:30	<i>lunch break</i>		
14:00	J. Hohwy	Philosophical aspects of the free energy principle	
15:00	<i>coffee</i>		
15:30	K. Friston, J.D. Haynes, J. Hohwy, P. Sterzer	Panel discussion	R. Aukstulewicz
17:00	End
